

Amendments to the Claims:

The following listing of claims will replace all prior versions, and listings, of claims in the application:

- 1-16. (Canceled)
17. (New) A method comprising steps of:
 - determining a first geographical location of an object;
 - taking, at the first geographical location, at least one first image of the object enabling identification of the object;
 - transporting the object from the first geographical location to a second geographical location;
 - taking, at the second geographical location, at least one second image of the object enabling identification of the object; and
 - determining, at the second geographical location, using the at least one first and second images, the first geographical location of the object.
18. (New) The method according to claim 17, wherein the object is a log.
19. (New) The method according to claim 18, wherein the first geographical location is a location of harvesting the log.
20. (New) The method according to claim 18, wherein at least one of the at least one first and the second images allow determining characteristic data about the log.
21. (New) The method according to claim 20, wherein the characteristic data include a volume of the log.
22. (New) The method according to claim 20, wherein the characteristic data include a mass of the log.
23. (New) The method according to claim 20, wherein the characteristic data include a quality of the log.

24. (New) The method according to claim 20, wherein the characteristic data include a species of the log.

25. (New) The method according to claim 20, wherein the characteristic data include curvature of the log.

26. (New) The method according to claim 20, wherein the characteristic data include a taper of the log.

27. (New) The method according to claim 20, further comprising, at the second geographical location, unloading a plurality of logs from a forwarder.

28. (New) The method according to claim 20, further comprising, at the second geographical location, reloading a plurality of logs onto a forwarder.

29. (New) The method according to claim 20, further comprising, at the second geographical location, processing a log in a sawmill.

30. (New) The method according to claim 20, wherein the first geographical location of each individual object is determined using a satellite based global positioning system.

31. (New) The method according to claim 17, wherein the at least one first and second image each include a pair of stereo images taken by a pair of cameras.

32. (New) The method according to claim 31, wherein the pair of cameras is mounted on equipment handling a log.

33. (New) A system for tracking an object being transported from a first geographical location to a second geographical location, the system being adapted to perform the method according to claim 17.
